4. <http://mosquitto.org/download/>

1. Install Paho MQTT: pip install paho-mqtt
2. Install GIT: link 2 (run as administrator) and in the git paste the following code

```
git clone https://github.com/eclipse/paho.mqtt.python
```

3. In CMD prompt paste: cd paho.mqtt.python
4. Install mosquito using command: python setup.py install
5. Install MQTT BROKER and CLIENT from mosquitto link4: select for windows 64 o 32 bit. (it is same as installing any other sw on windows)
6. Run mqtt related code in python editor and run it should work.
